# Introducing Bootstrap.

Need reasons to love Bootstrap? Look no further.

By nerds, for

# nerds.

Built at Twitter by [@mdo](#) and [@fat](#), Bootstrap utilizes [LESS CSS](#), is compiled via [Node](#), and is managed through [GitHub](#) to help nerds do awesome stuff on the web.

## Made for everyone.

Bootstrap was made to not only look and behave great in the latest desktop browsers (as well as IE7!), but in tablet and smartphone browsers via [responsive CSS](#) as well.

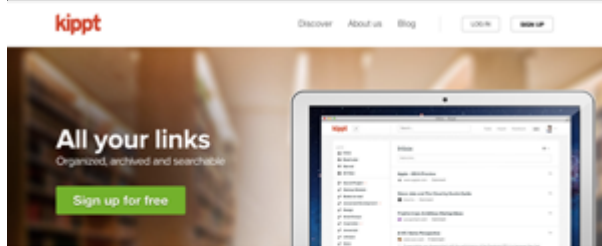

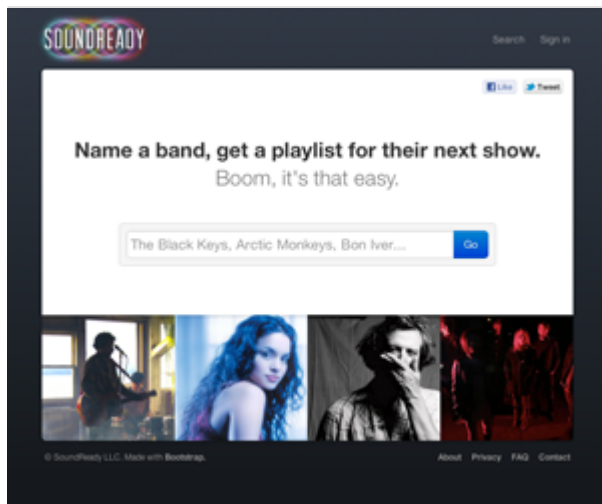

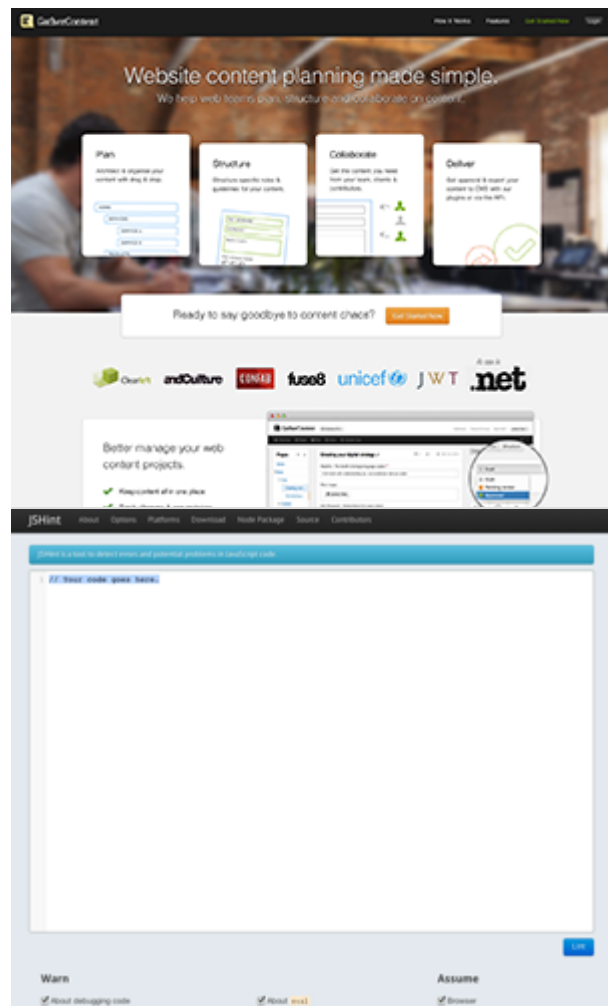

## Packed with features.

A 12-column responsive [grid](#), dozens of components, [JavaScript plugins](#), typography, form controls, and even a [web-based Customizer](#) to make Bootstrap your own.

# Built with Bootstrap.

For even more sites built with Bootstrap, [visit the unofficial Tumblr](#) or [browse the examples](#).
